HOW TO “BALI”

- **Fresh water**, in most areas of Bali is clean and usable, but not necessarily drinkable. Only drink from bottled mineral water.
- **Food**, is also easy to order with the famous Indonesian online food delivery apps such as Gojek and Grab. Do not leave the island before you try its famous local delicacies such as Babi guling (suckling pig) and Terang bulan (sweet local pancake).
- **Respect religious customs**, especially when you do a temple trip and please be mindful of all the sacred religious sites. In general, picture taking is allowed, but touching / entering sacred areas are strictly prohibited.
- **Haggling**, is very common at Bali's street side outlets. Kick off the conversation with 50% off the starting price. One thing to remember – always be respectful during the process.
- **Money Changer & Transportation**, only go to trusted vendors at public areas, or simply go to the ones we have in the hotel area at the basement area.
- **Love the earth**, Bali proudly pioneered the free plastic bag campaign a few years ago, so join us in this great initiative by bringing your own reusable bag when you go shopping and using a refillable water bottle whenever possible.
- **Stay safe**, when getting around, whether by online transportation or even by foot. If you ever decide to drive your own vehicle, please ensure to always wear your helmet and carry your international driver's license.
